## Off to new shores: AquaNetto-IMETH India

Pursuant to AquaNetto and IMETH receiving the cleanest technology prize at the Green Building Congress 2012 in Hyderabad, the two Swiss companies are establishing their very own subsidiary in India. AquaNetto-IMETH Water Treatment Solutions India (ANI Water Treatment Solutions PVT LTD) will be fully operational in the next couple of months, providing an additional support and impetus to our pilot projects currently in development in India. We are pleased to count new members in our team and announce that ANI India will be headed by an Indian manager with more than 15 years of experience in the water treatment sector from the beginning of May 2013.

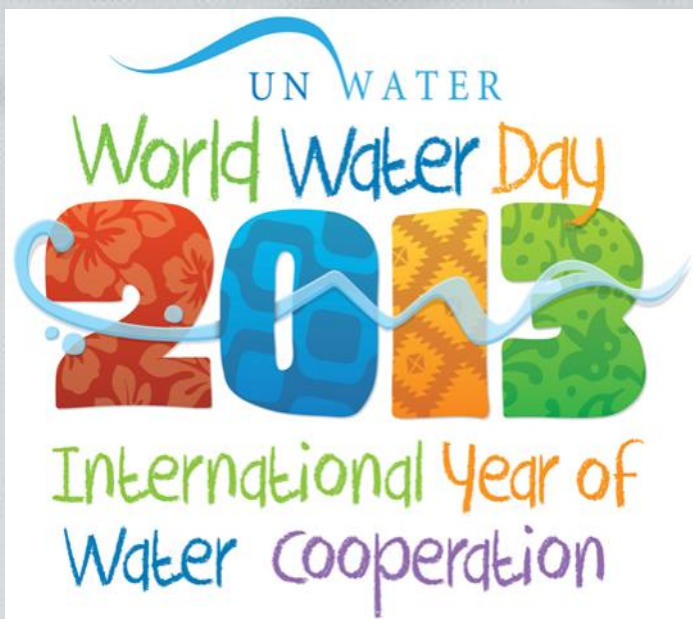

## Know your water!

The quality of your water source is an important element in the development of any water treatment solution. In order for us to engineer the appropriate solution for your specific needs we invite you to fill out our solution development questionnaire. The general questionnaire is designed for those who do not have detailed information about their water. The technical questionnaire lists all pertinent parameters required for the speedy development of your water treatment solution.

## Join AquaNetto's efforts in the International Year of Water cooperation

The United Nations General Assembly has declared 2013 to be the International Year of Water Cooperation. Launched at the UNESCO Headquarters, the international year of cooperation in the field of water was marked recently by the International Day of Water, held on Friday, March 22<sup>nd</sup>. By promoting cooperation amongst stakeholders inter alia UN WATER, UNESCO, NGOs, public authorities, and private enterprises, the UN hopes to ensure access to safe drinking water for all. Keep in touch with AquaNetto's efforts towards international cooperation and the sustainable management of resources provided by the AquaNetto Water Kiosk.
